Media Release

For Immediate Release

Wellington Drive announces the signing of customer terms and conditions for supply of the SCS Connect cooler fleet management solution.

Wellington is pleased to announce that it has signed a large global consumer brand's Master Terms and Conditions for the supply of Wellington's 'Cloud Connected' SCS Connect solution.

This agreement allows Wellington to be considered as an approved supplier to this customer and forms the basis for future supply agreements. The Terms and Conditions agreement does not constitute a commitment by the customer to business or to volume, but is an important step in developing the purchasing relationship with this customer.

Wellington's CEO, Greg Allen commented "This is further evidence of the value we are adding to our customers with our new 'Cloud Connected' SCS Connect platform, which provides refrigeration management, cloud connectivity, telemetry and data-reporting services to help our customers improve the performance of their cooler fleet. We are very pleased that this customer is working with us to adopt our platform."
